Question 1

Correct

1.00 points out of 1.00

Which header is used to send the username and password from the client for Basic Authentication?

Select one:

- ☐ a. Permissions
- ☒ b. Authorization
- ☐ c. Login
- ☐ d. SignIn
- ☐ e. Authentication

Your answer is correct.

The correct answer is: Authorization

Question 2

Correct

1.00 points out of 1.00

What encoding is used to send the username and password from the client to the server in the request header?

Select one:

- ☐ a. Binary
- ☐ b. Hex
- ☒ c. Base64
- ☐ d. Url encoded
- ☐ e. Base128

Your answer is correct.

The correct answer is: Base64

Question 3

Correct

1.00 points out of 1.00

You can set an expiration date and time for a cookie.

Select one:

- ☒ True ✓
- ☐ False

Correct. We can set an expiration for cookies. This is useful for security purposes so that a cookie only has a limited time window it can be used.

The correct answer is 'True'.

Question 4

Correct

1.00 points out of 1.00

Express has a native feature that will parse cookies and signed cookies from an incoming request into a JavaScript object.

Select one:

☐ True

☒ False ✓

Correct! Express requires a plugin such as 'cookie-parser' to parse cookies. Cookie-parser is installed automatically when you use the Express Generator utility to scaffold out an Express application, but cookie-parser is *not* actually a native, built-in module in Express.

The correct answer is 'False'.

Question 5

Correct

1.00 points out of 1.00

Which types of authentication did we learn about?

Select one or more:

☒ a. Basic

☒ b. Cookie

☐ c. Two-Factor

☒ d. Token

☐ e. Key

Your answer is correct.

The correct answers are: Basic, Cookie, Token
